

Below is a little background.

My name is Jordan Schleider and I sold my IT business and retired about 18 years ago. To keep myself busy I am a professional captain and I run a high-end private fishing charter business out of Boca Raton, Florida.

EJS Fishing Charters is one of the only private fishing charters in the country to offer Slow Pitch Jigging and provide high end gear. Please Google "slow pitch jigging charters" and see who pops up. We are the only ones. Slow pitch jigging is a very technical, specialized form of fishing that produces more fish and creates a better hands-on experience for our customers. We focus on higher end clients and offer the use of the best jigs, reels, and rods. We also provide instructions during charters. Many of our clients are recommended from tackle shops where the customer is looking to demo the gear or learn the techniques.

We have potential to reach more than 4000 high income fishing, boating, and sporting enthusiasts per year on our charters alone. People come from all over the world to specifically try slow pitch jigging with us. Our customers and their friends and family look for recommendations on boats, electronics, engines, fishing gear, terminal tackle, fishing line, clothing, and any other items we use. We have been able to influence many of them by the products we use and wear. We are extremely brand loyal.
